VR Training Solutions

now available @ HARDHATVR.COM

With **Hard Hat VR Training Solutions**, users are able to digest and retain complex information at a much higher rate. All students learn at a different pace and in different ways. Some are visual learners, others work best with hands-on stimulation or verbal commands. VR can facilitate these various learning styles and help students excel and retain vital knowledge.

WAREHOUSE HAZARD AWARENESS

The Warehouse Hazard awareness simulation is ideal for employees or supervisors who work in or visit warehouses. You will learn:

- Routines for maintaining a safe warehouse
- Safe material handling and storage procedures
- How to prevent and prepare for emergencies
- Safe lifting techniques and more....

FIRE HAZARDS

The Warehouse Fire Hazard Awareness simulation is ideal for employees or supervisors who work in or around warehouse operations. You will learn:

- How to identify specific warehouse fire hazards
- Participate in preventing accidents in the warehouse
- What to do in the event of a fire
- The proper use of a fire extinguisher to put out a fire and more....

WORKING FROM HEIGHTS

The Warehouse Fire Hazard Awareness simulation is ideal for employees or supervisors who work in or around warehouse operations. You will learn:

- Understand the role of a personal fall arrest system
- Inspect and select a safety harness
- Inspect and select a lanyard
- Inspect and select an anchorage point and more....

EXCAVATION & TRENCHING

The Trenching and Excavation Simulation is ideal for employees or supervisors who work in or around trenches on construction sites. You will learn:

- How to identify possible excavation and trenching hazards
- How to respond to an excavation or trenching emergency
- Practice proper safety procedures
- See the consequences of improper actions and more...

FALL PROTECTION

The Fall Protection awareness simulation is ideal for employees or supervisors who work in or around construction environments. You will learn:

- Utilize a personal fall arrest system
- Inspect and select a safety harness
- Inspect and select a lanyard
- Identify specific fall hazards and more...
